

# Make good choices to manage your individual risk

RISK FACTOR	LOWER RISK	HIGHER RISK	MAKE GOOD CHOICES...
<b>You?</b>	Vaxxed and boosted	Not vaxxed	Vaccination is very safe and highly effective against serious illness
<b>Your area?</b>	Transmission rates are low	Transmission rates are higher	Take more precautions when transmission rates go up
<b>Your health?</b>	No health risk factors	Have health risk factors	Take precautions based on risk level, respect others who do
<b>Who else?</b>	Small group, all vaxxed	Large crowd, unknow vax status	Be careful with indoor crowds
<b>What?</b>	Talking, studying	Shouting, singing, exerting	Make sure you are in a good location
<b>Where?</b>	Outdoors	Indoors	Go outside, keep a mask handy
<b>When?</b>	Short duration	Long duration	When there are other risks, keep it short
<b>How?</b>	Spread out, good ventilation	Close together, poor ventilation	Find a bigger room, bring in outside air
<b>Wear?</b>	A good mask (KN95)	No mask	Even a solo mask provides good protection
